Laboratory Papers. V.1- Volume 3

By Cornell University Breeding

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1914 Excerpt: .obtained, yet it is well to mention a few. With oats, color studies have been made in various crosses. In Avena fatuaXA. sativa (variety Sixty-Day) crosses it is found that the yellow color of the Sixty-Day apparently inhibits awn production as well as the production of pubescence. In a cross between two black oats classed as the same type, non-black oats appear in the second generation in the ratio of 15 black to 1 nonblack. Crosses between hulled and naked oats show that these characters behave as a simple monohybrid, but that there is apparently some modifying factor present which affects the amount of hull in the heterozygous forms. With wheat the red color of kernel is found to be represented by one, two, and three factors in inheritance. This is in accordance with the results of other workers. Many crosses between the different species are...
