Light is reflected according to two laws: (a) The angle of reflection is equal to the angle of incidence. (6) The incident and the reflected rays are both in the same plane which is perpendicular to the reflecting surface. Refraction. The change of direction which a ray of light undergoes upon entering obliquely a medium of different density from that through which it has been passing. In this case the following laws obtain: (a) Light is refracted whenever it passes obliquely from one medium to another of different optical density. (6) The index of refraction for a given substance is a constant quantity whatever be the angle of incidence. (c) The refracted ray lies in the plane of the incident ray and the normal. (d)...
